Number of transports
analyzed

Summary

Activity over the period and options selected above.

	Unit	Analyzed trips
Price charged to Appload		
Price charged per trip to Appload		
Number of deliveries		
Loaded weight		
Total kms (approx)		
Tonnage/trip		
km/trip		

KPIs

Activity over the period and options selected above.

1. Operational KPIs	Unit	Analyzed trips
Percentage of on-time arrival at loading		
Average loading duration per trip		
Average transport duration		
Average Distance Covered per Day (km/day / trip)		
Percentage of on-time arrival at offloading		
Average offloading duration		
Average border crossing duration (for cross border trips only)		
Percentage of demurrage occurrences		
Total number of demurrage days charged		

2. Incident and Issue Tracking during the trip	Unit	Analyzed trips
Total accidents occurred during transportation		
Total mechanical issues encountered during transportation.		
Total documentation issues (missing or incorrect documentation causing delays)		
Total stops caused by inspections, fines, or authority actions.		
Total delay time caused by all issues above		
Percentage of trips with cargo damage incidents.		
Percentage of trips with client or third-party complaints		

3. Cost KPIs	Unit	Analyzed trips
Cost per km	ZAR/Km	
Cost per ton		
Cost per ton-km		

TRANSPORTERS**4. Efficiency & Environmental gains from Backload utilization**

	Unit	Analyzed trips
Backload trip		
CO2 emissions reductions from Backload trips		
Margin over fuel cost on backload trips	Percentage	

5. Communication and quality of service

	Unit	Analyzed trips
Overall assessment of updates from transporter and driver		
Overall assessment of client's feedback and responsiveness.		
Client wants to use the transporter again? (% of yes over all analyzed trips)
